TUSCARORA

Fertilizers Are Better

Have you been getting the desired results from the use of Fertilizers? If not, why not? Possibly they do not contain the necessary plant foods needed by your soil. It may be good Fertilizer and yet not be suited to your needs. Come in and we will talk Fertilizers together. It might be we can be of some help to you in growing better crops.

All Farm Products Are High

and you will find it more profitable to fertilize your crops this season, than ever before. Therefore you cannot afford to take any chances by trying some off brand. Let us sell you the old Reliable and well known

TUSCARORA BRAND

H. B. COLE, Lutesville, Mo

Southeast News.

Campbell Citizen.

Dunklin county made 11,981 bales of cotton less in 1915 than in 1914. New Madrid 6,000 bales less, and Pemiscot 10,000 less. All other cotton raising counties in Missouri fell down in the same proportion.

The citizens of Perry county voted on a stock law proposition March 28, in a special election. The idea was to restrain hogs and sheep from running at large, but the proposition was defeated by a majority of 387 votes.

Elmo Implicite.

On Monday a train load of auto trucks, consigned to the United States army on the Texas border, passed through this city. It was an Iron Mountain shipment and the train was running on passenger schedule.

St. Louis Herald.

John Houck lost a little daughter by death on Monday, the result of a blow received on her head several months ago while at play at school. One of her playmates struck her with a small stick behind the ear, causing a slight abrasion of the skin, which soon healed. The injury recently gave her trouble again and caused her death.

Perryville Sun.

Perhaps the largest private land sale that was ever made in Perry county was completed this week, when J. W. Fortney transferred his fine 224-acre bottom farm in Bois Brule bottom to August Rudloff for \$25,750. Mr. Rudloff transferring his fine stock farm near Minnith, Mo., containing 420 acres for \$12,600, making a total of \$38,350.

Bonne Terre Register.

The M. R. & B. T. railway has received within the last few days 200 re-built dump cars which are used in hauling rock from the shafts to the mill. This is the first order of equipment of consequence for many years according to officials of the railroad. Of recent date the company purchased a consignment of 90-lb. steel rails and the management is looking forward to other improvements in equipment.

Frank Goldsmith, 23 years old, suffered injuries while at work in the mines at Mine la Motte March 24, from which he died in a short time. He was an underground worker and a rock fell on him and caused the injuries. Mr. Goldsmith formerly resided at Patton, according to the reports in the papers up there, and his remains were brought to the vicinity of Yount for interment. He leaves a widow and one child.

Bonne Terre Register.

The St. Joseph Lead company is working on plans and specifications for a quarter million dollar power plant to be built at Rivermines dur-

ing the coming summer and fall according to high officials of that company. The building will be constructed of steel and brick and will be one of the finest plants of its kind in the state. The power will be steam turbine of 3500 k. w. single unit, built so it can be duplicated. The power for the three plants of Bonne Terre, Leadwood and Rivermines has heretofore been furnished from Bonne Terre and Rivermines. The new plant transmission of power will run parallel with the present system and will be able to furnish power for all the plants. The work will begin in the near future and will be completed sometime this fall.

Bonne Terre Democrat.

Scott county is about to lock horns with the Little River Drainage district and finds herself in exactly the same quandary as Cape county with regard to the building of bridges across the dit, hes being dug by the contractors in the district. The County court met in special session Tuesday for the purpose of considering this matter and following is the order relative thereto: "It appearing to the court that the ditch contractors who are digging a drainage ditch in the north part of this county are about to dig across the public road on the rock levee on the Cape Girardeau road, it is hereby ordered and directed that the prosecuting attorney, G. R. Daugherty, proceed at once by injunction or other legal proceedings in the Circuit court of Scott county to prevent and prohibit the cutting of said public highway." It has been estimated it will cost \$10,000 to build the bridges across the ditch above referred to and as there will be several more cuts in the public roads of the county the cost of bridging the gaps will be enormous. Some one has figured it will mean the expenditure of \$75,000 in this county alone to bridge the channels of the Little River Drainage district.

Obituary

James A. Belchamber was born at Port Huron July 2, 1856, came to Missouri when a boy and settled near Glen Allen. He married Louvena Peterman who, with four daughters and one son, survive to mourn their loss.

The subject of this sketch had been a member of Glen Allen Baptist church for many years, and was one of the deacon board on which he served with honor. He was a strong supporter of the schools—believed in Christian education—and missions, often backing them with his means, as well as his prayers.

Glen Allen church and Will Mayfield College have lost a staunch friend and supporter. Such men are worth more than we can measure. May God raise up some one to take his place.

Mr. Belchamber was in the rail-

road service for more than forty years and never had an enemy in all that time. The Brotherhood of Locomotive Engineers presented a most beautiful floral tribute, as an expression of love and esteem. The funeral was preached by Rev. W. A. Davault and the interment was conducted by the Masonic lodge of which he was a worthy member.

He was an expert in locomotive engineering, having been honored by premiums and special mention on different occasions. His long life as engineer was free from accident and marked with much success. His motto: "Keep your hand upon the throttle and your eye upon the rail," was practiced throughout his life.

A truly good and great man has gone to his reward. He was great in his church, great in his vocation, great in his brotherhood, great in his fraternal relations and great as a citizen.

He went from us March 12, 1916. We look thru our tears to a better day, where it will be one bright summer always and separations do not come.

May God bless his family.

A FRIEND.

Representative Igoo To Run

The St. Louis Republic on March 28, under the above caption, had the following to say editorially:

"In his public addresses Speaker Clark has advised the voters times without number that when they send a good young man to congress it is to their interest to keep him there. We do not know a better illustration of the value of this advice than the career of the speaker himself, who might be a distinguished lawyer practicing in St. Louis, Chicago or New York if the people in and around Pike county had not had the good sense to elect themselves and the country the benefit of his abilities for a long period in which he had opportunity to gather wisdom, experience and power."

"Representative Igoo was disposed at about the time the present session opened to make this his last term in congress, although it is only his second and he is still on the sunny side of 40. His record has been good; he has already won important committee appointments, and his ability to grow in usefulness to St. Louis is undoubted. All that he or any similar young man needs to acquire a position of real power is time."

"He now announces that he is willing to give the time if the people of the Eleventh district are willing to give the opportunity, and we do not know how the people of that district can serve themselves and the country better in a political way than to send him back to congress at the next election."

The above article fits the case of our own congressman, Hon. Walter L. Hensley, and we feel sure he will be returned by a good majority.

Are Your Little Chicks Dying?

There is a peculiar disease of young chicks known as the "bacillary form of white diarrhea" which causes great loss of young chicks. Countless thousands of little chicks are lost annually by the ravages of this disease.

The chicks may contract the disease from at least two sources:

1. From the parent stock (inherited through the egg)
2. From each other (infected droppings).

A word of explanation. It has been discovered that certain hens lay infected eggs (germ laden eggs) that contain the disease germs. A chick hatched from one of these infected eggs holds the germs within its body in the unabsorbed yolk. Generally the chick dies, but while living is a source of great danger for the other chicks. Its droppings contain the deadly germs and when these are picked by the healthy chicks, they in turn become infected. This is very noticeable up to four days of age.

The infected or sick chicks have a "stilted" appearance, may or may not be "pasted-up behind," and are generally weak.

So far as is known there is no cure for this disease. Numerous so-called "cures" are advertised, but their val-

ues have not been determined by actual experimental proof.

To put down the loss, feed pure clean sour milk, keeping it constantly before the chicks.

The source of the trouble is the breeding stock. It is advisable to have the stock tested out by the blood test method, a small amount of blood is taken from each individual fowl and then forwarded to the State Poultry Experiment Station, Mountain Grove, Mo., where it is examined. Full directions may be had upon application.

If you are losing many little chicks and care to have your trouble analyzed and protect yourself from future losses, ship by express two or three dead chicks, chicks that have not been dead over a few hours. Place the chicks in a water tight tin can (coffee can will do). Pack the can in saw dust and ice and send express prepaid.

The Missouri State Poultry Experiment Station is only too glad to co-operate with you in the handling and treatment of diseased fowls.

For further information, address Department of Bacteriology, Missouri State Poultry Experiment Station, Mountain Grove, Mo.

Scars and Roebuck Know

Herman Rosenthal, advertising manager for Sears, Roebuck & company in the course of a recent address before the Ad Club convention made the following statement:

"We have a bureau whose duty it is to read each week the country newspapers from all over the country. There is not a paper of any consequence in our trade territory we do not get. The bureau looks over these papers and when we find a town where the merchants do not advertise in the local paper we immediately flood that territory with

our literature. It always brings results far in excess of the same effort put forth in territory where the local merchants use their local paper."

There is a lesson between the above lines for many merchants over the country. Herman Rosenthal realizes that the local papers, where they are used persistently and judiciously by the local merchants, are his worst enemy—Parma Courier.

The price of drugs has advanced from 30 to 500 per cent during the last two years, and the retail druggist has been forced to advance his prices according to the advance made by the manufacturers and wholesalers. The local butcher, the grocer, the dry goods merchant and nearly everyone with whom the public does business have already explained that the high cost of necessities is an account of the war. Now comes the printer, the man who has plodded along paying the gradually advancing prices for paper, ink, and all printing material and patiently hoping for these things to drop to the normal prices in order that he could sell his products at the same old price, to tell the public that he must raise his prices on job printing. Paper of all grades has recently jumped up, until if it goes much higher the printer will need a balloon or an airship in order to get high enough to even ask the price. Printers ink, especially the colored inks, have advanced in some cases 600 per cent and all type metal such as lead, brass and copper—well, you all know what the war has done for those. And so, in order to keep up with the procession the printer must follow the lead of the others and advance his prices just "a leetle." We merely mention these things to prepare our customers and prevent an undue shock to their nerves when the Eagle gets the next printing for them, for we assure you all, the price will be a little bit out along the line. However, this is not to be construed as an apology. It is a mere statement of facts and the merchant does not apologize when he gets up from four cents to eight cents. He tells you the price and you grumble, but you buy the sugar—Eagle Prairie Eagle.

"What a little man! I remember him when I was a boy. He was a little fellow, but when he was out there, he was a little fellow."

Man Wanted

Wanted—A man for hard work and rapid promotion; a man who can find things to be done without the help of a manager and three assistants.

A man who gets to work on time in the morning and doesn't imperil the lives of others in an attempt to be first out of the office at night.

A man who is neat in appearance and doesn't sulk for an hour's "overtime" in emergencies.

A man who listens carefully when he is spoken to and asks only enough questions to insure the accurate carrying out of instructions.

A man who moves quickly and makes as little noise as possible about it.

A man who looks you straight in the eye and tells the truth every time.

A man who does not pity himself for having to work.

A man who is cheerful, courteous to everyone and determined to "make good."

A man who, when he does not know, says "I don't know," and when he is asked to do anything says "I'll try."

A man who does not make the same mistake twice, who is not a goody-goody, a prig or a cad, but does the very best he knows how with every task entrusted to him.

This man is wanted everywhere. Age or lack of experience do not count. There isn't any limit, except his own ambition, to the number or size of the jobs he can get. He is wanted in every big business from Maine to California. Not that they are short-handed, but they have innumerable uses for a man of that caliber—Exchange.

We've Carefully Planned to Accentuate More Forcefully Than Ever the True Helpfulness and Economy of Shopping at Taylors in This

VALUE GIVING Demonstration

EVERY section of the store joins in this aggressive campaign of intensive merchandising, bringing forth only TRUSTWORTHY MERCHANDISE of CORRECT STYLE and in every way desirable.

The extremely low operating expense of this Store, the cash buying and selling plan and the declared policy of this VALUE-GIVING DEMONSTRATION SALE all mean economies of first magnitude to those who come here.

Follow the Crowds

to this Store and inspect the unrivaled value-giving merchandise we are offering. You can't beat or equal our goods or prices elsewhere on Spring DRESS GOODS and TRIMMINGS, SHOES and SLIPPERS, CLOTHING, ETC.

Smart Spring Millinery

Styles that have won instant approval are Specially priced at this Store.

A charming diversity of the rich tones in vogue this season and plenty of fashionable black in every detail, they reflect fashion's mandates most charmingly. Call and see them.

Swift's Pure Spring Fertilizer will increase your crops and fill your pocket book. It's the best. We have a fresh car load. Try it.

Yours for business,

Taylor Mercantile Company,

Marble Hill, Missouri
